PS-9010 12 TO 28 VDC CONVERTER

OPERATION AND INSTALLATION MANUAL

WARRANTY POLICY

GROUND AND MARINE PRODUCTS

Sunair Electronics warrants equipment manufactured by it to be free from defects in material or workmanship, under normal use for the lesser of one (1) year from the date of installation or 15 months from date of shipment by Sunair.

Sunair will repair or replace, at its option, any defective equipment or component of the equipment returned to it at its factory, transportation prepaid, within such warranty period. No reimbursement will be made for non-factory repair charges.

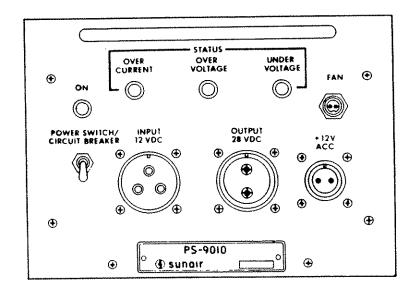

This warranty is void if equipment is modified or repaired without authorization, subject to misuse, abuse, accident, water damage or other neglect, or has its serial number defaced or removed.

THIS WARRANTY IS ESPECIALLY IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. The obligation and responsibility of Sunair shall be limited to that expressly provided herein and Sunair shall not be liable for consequential or other damage or expense whatsoever therefore or by any reason thereof.

Sunair reserves the right to make changes in design or additions to or improvements in its equipment without obligation to install such additions or improvements in equipment theretofore manufactured.

PS-9010

12 TO 28 VDC CONVERTER

OPERATION AND INSTALLATION MANUAL

FIRST EDITION DECEMBER, 1991

PRODUCT SERVICE:

In case of difficulty please contact the Sunair Product Service Department, between the hours of 8:00 AM and 5:00 PM Eastern Time or write to:

Product Service Dept.
Sunair Electronics, Inc.
3101 SW Third Avenue
Ft. Lauderdale, FL 33315-3389
U.S.A.

Telephone: (954) 525-1505

Fax: (954) 765-1322

e-mail: techsupport@sunairhf.com

TRAINING:

Sunair offers training programs of varying lengths covering operation, service, and maintenance of all Sunair manufactured equipment. For details please contact the Product Service Department.

SUNAIR PS-9010

SECTION I

GENERAL INFORMATION

1.1 DESCRIPTION

The PS-9010 is a reliable, heavy duty 12 to 28 VDC converter intended as a highly efficient primary equipment power source. Although housed in a relatively small package, the PS-9010 is completely modularized and easily maintained. The unit employs highly advanced power handling technology, and is completely protected for overcurrent or overvoltage conditions. Designed to accommodate harsh military environments, the PS-9010 is an ideal approach to fitting 28 VDC electronic equipment to 12 VDC vehicular or emergency power sources.

1.2 TECHNICAL SPECIFICATIONS

1.2.1 GENERAL

Dimensions: 5.5" High X 9.0" Wide X 9.65" Deep, including handle.

(14 cm H X 23 cm W X 25 cm D.)

Weight: 12 Lbs (5.45 kg).

Construction: Modular, Plug-in Assemblies.

Input Protection: DC Circuit Breaker.

Output Protection: Electronic Over Current, Over Voltage and Under Voltage Detectors.

On/Off Control: Front Panel Switch / Circuit Breaker.

Remote On/Off: 12 VDC or Ground, Internally Programmable, Switch Current: 100 ma Max.

Fault isolated to module level. Failure indicators located on Front Panel for:

- (a) Under Voltage,
- (b) Over Voltage,
- (c) Over Current.

1.2.2 ENVIRONMENTAL

Temperature: -30 C to +50 C.

Humidity: 100% at 50 C.

Shock: MIL-STD-810D, Method 516.3.

Vibration: MIL-STD-810D, Method 514.6.

1.2.3 ELECTRICAL

Input Voltage: 11.0 VDC to 15.0 VDC (Operation permitted to 10.5 VDC at reduced output power).

Input Current: 35 Amperes at 13.6 VDC input / 14 Amperes out.

Input Current (RT-9000): At 13.6 VDC: (a) CW, 125 Watts: 35 Amperes (b) CW, 65 Watts: 23 Amperes.

Output Voltage: 28 VDC (13.6 VDC input).

Output Voltage Regulation: -7% +3%.

Output Voltage Hum and Noise: Less then 250 MV PPK at rated output.

Output Current: 15 Amperes maximum (13.6 VDC input).

Duty Cycle: Continuous at 13.6 VDC input.

Efficiency: 80% minimum.

1.3 EQUIPMENT SUPPLIED

The following is a list of equipment, with appropriate Sunair part numbers, supplied with the PS-9010.

SUPPLIED EQUIPMENT	SUNAIR PART NUMBER		
12 to 28 VDC Converter, PS-9010	8076310091		
Manual	8076300509		
Mating Connector Kit	8076300495		

SECTION II

INSTALLATION

2.1 GENERAL

Section II contains all necessary instructions for unpacking, inspection, and, if required, reshipment of the equipment or parts. Information regarding location and mounting considerations, power requirements, ground system hookups, and cabling considerations is also provided.

2.2 UNPACKING AND INSPECTION

As soon as you have received your unit(s), unpack and inspect all components and accessories. Check the packing list to be sure you have received all items ordered, and that all items necessary for operation have been ordered.

NOTE:

Be sure to retain the carton(s) and associated packing materials should it be necessary to reship the equipment.

Do not accept a shipment when there are visible signs of damage to the cartons until a complete inspection is made. If there is a shortage of items or any evidence of damage, insist on a notation to that effect on the shipping papers before signing the receipt from the carrier. If concealed damage is discovered after the shipment has been accepted, notify the carrier immediately in writing and await his inspection before making any disposition of the shipment. A full report of the damage should also be forwarded to Sunair's Product Services Department. Please be sure to include the following information for prompt service:

- a) ORDER NUMBER.
- b) MODEL AND SERIAL NUMBER.
- c) NAME OF TRANSPORTATION AGENCY.
- d) APPLICABLE DATES.

Upon receipt of this information, Sunair will make arrangements for repair or replacement.

2.3 RETURN OF EQUIPMENT TO FACTORY

The shipping carton for the PS-9010 has been designed to protect the equipment during shipment. The container and its associated packing materials should be used to reship the equipment.

When necessary to return equipment to Sunair for warranty or non-warranty repair, an authorization number is required. This number can be obtained from our Product Services Department: TELEPHONE: (954) 525-1505, FACSIMILE: (954) 765-1322.

If the original shipping carton is not available, be sure to carefully pack each unit separately, using suitable cushioning material where necessary. Very special attention should be given to providing enough packing material around connectors and other protrusions from the unit. Rigid cardboard should be placed at the corners of the equipment to protect against denting. DO NOT USE DUNNAGE (e.g., STYROFOAM PEANUTS) FOR PACKING PROTECTION; it may allow the unit to shift while being shipped, and, therefore, become damaged.

When returning subassemblies or components for repair or replacement, be sure to pack each separately, using suitable cushioning material.

Shipment to be made PREPAID consigned to:

Sunair Electronics, Inc.
Product Services Department
3101 SW Third Avenue
Fort Lauderdale, Florida 33315-3389
U.S.A.

Plainly mark with indelible ink all mailing documents as follows:

US Goods Returned For Repair Value For Customs - \$(Amount)

Mark ALL SIDES of the package:

FRAGILE - ELECTRONIC EQUIPMENT!

NOTE:

Before shipping, carefully inspect the package to be sure it is marked properly and is securely wrapped.

2.4 GENERAL INSTALLATION AND MOUNTING INFORMATION

Carefully plan Transceiver / Peripherals / PS-9010 and Battery / Alternator system locations. Figure 2.4.1 shows optimum maximum distances for power cables. Figures 2.4.2 and 2.4.3 show the overall dimensions and outline mounting details of the unit.

2.5 ELECTRICAL CONNECTIONS

TO ADD	CONNECT	NOTE		
DC Power Input	+12 VDC source to J1 on front panel.	See Figure 2.4.1.		
+28 VDC Output	J2 on front panel to J3 on rear panel of RT-9000.	See Figure 2.4.1 and consult RT-9000 manual (Figure 2.4.1.1).		
+12 VDC Accessory	J4 on front panel to +12 VDC input connector on appropriate accessory.	See Figure 2.4.1 and consult appropriate accessory manual.		
+28 VDC Fan (optional)	J3 on front panel to optional 28 VDC fan.	See Figure 2.4.1.		

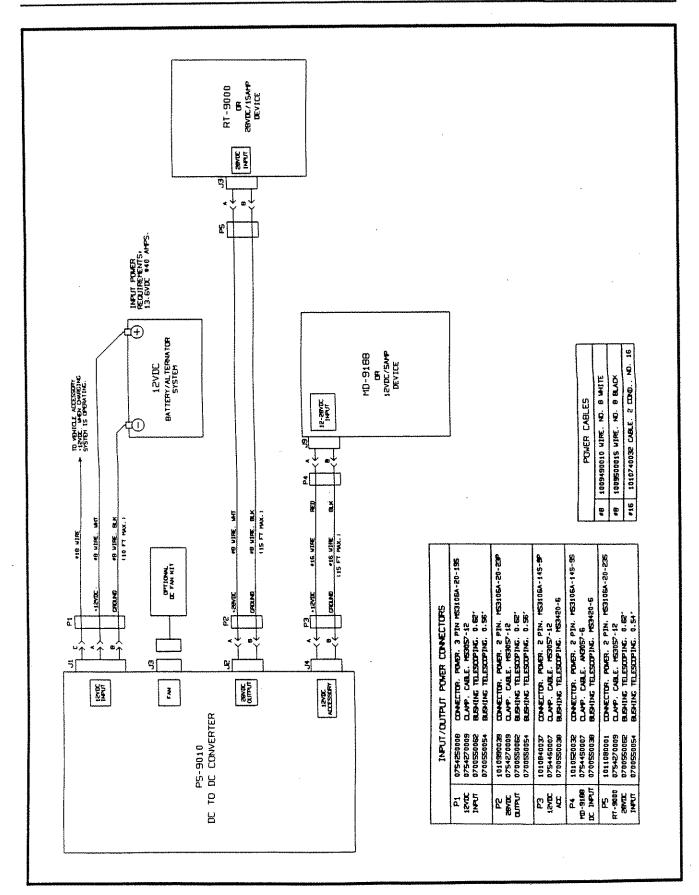

Figure 2.4.1 Interconnect Block Diagram.

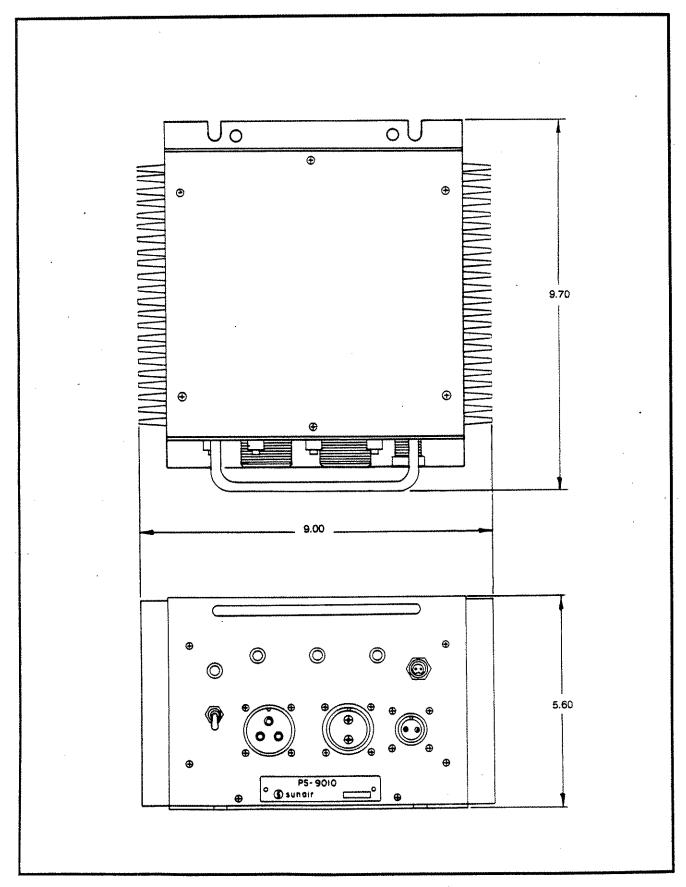

Figure 2.4.2 Outline Mounting Details, PS-9010.

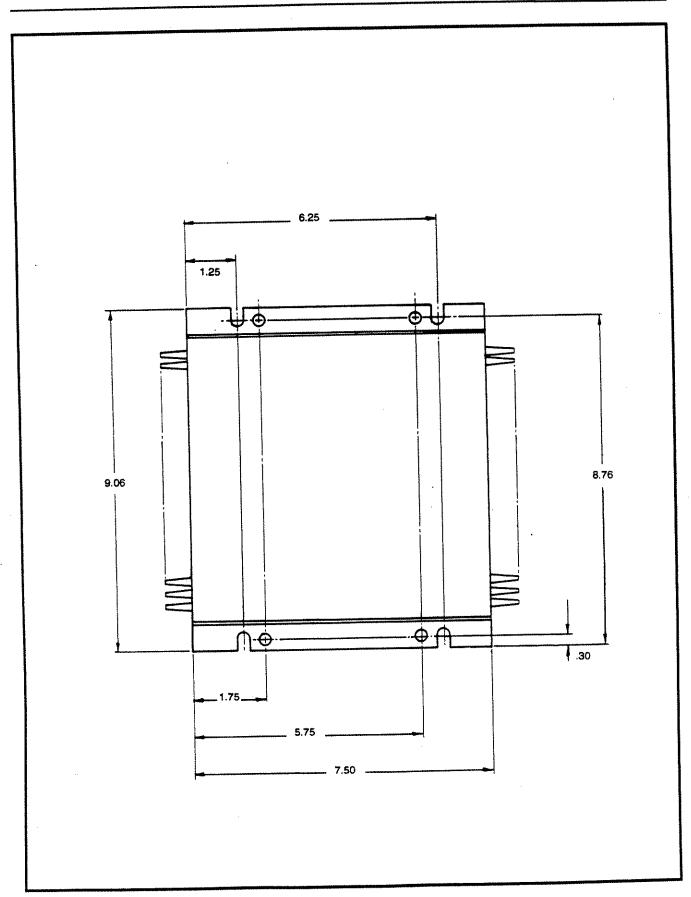

Figure 2.4.3 Outline Mounting Details, PS-9010.

SUNAIR PS-9010

SECTION III

OPERATION

3.1 **GENERAL**

This section provides the operator with the location and use of the PS-9010 front panel control and indicators.

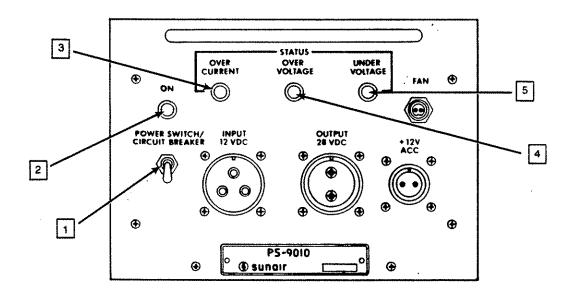

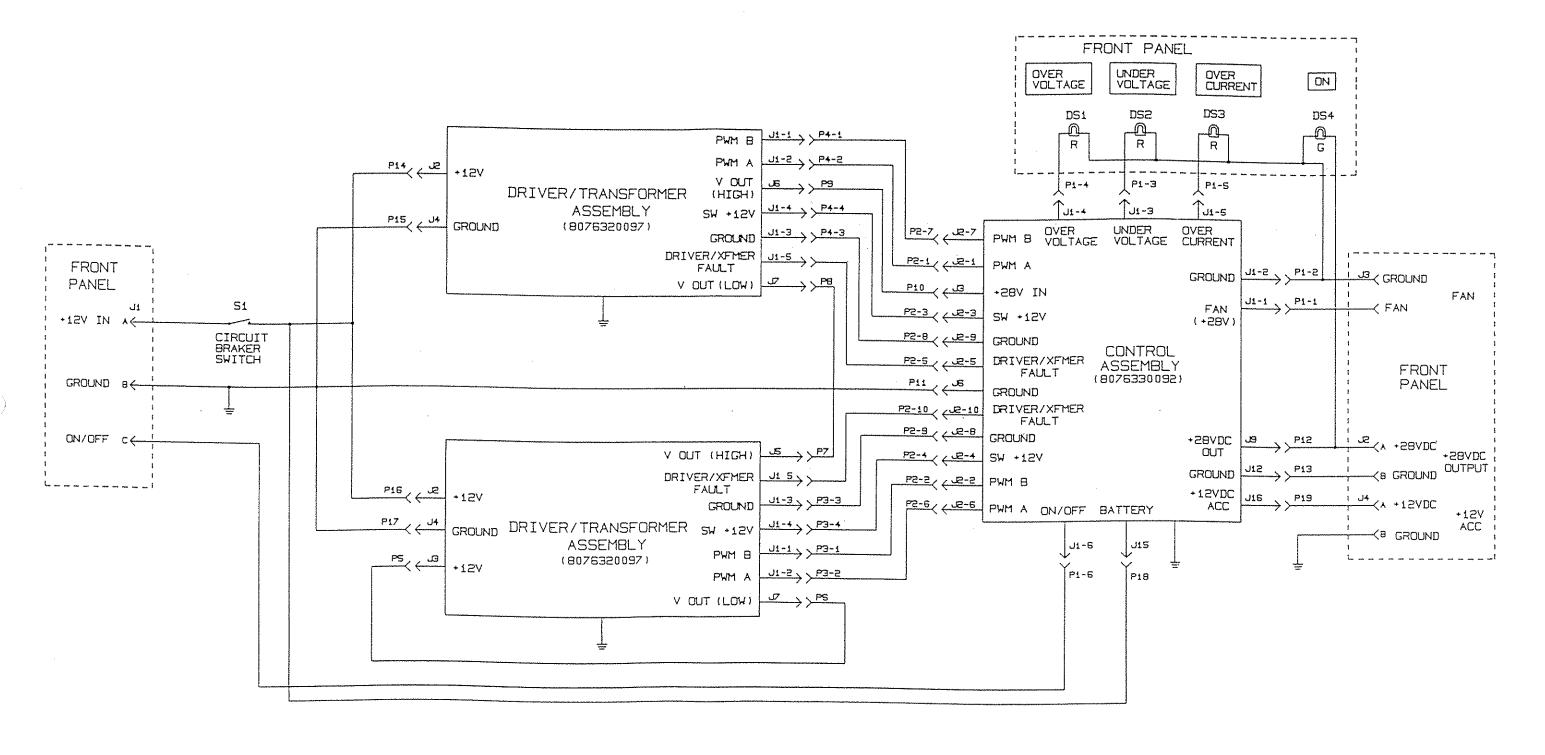

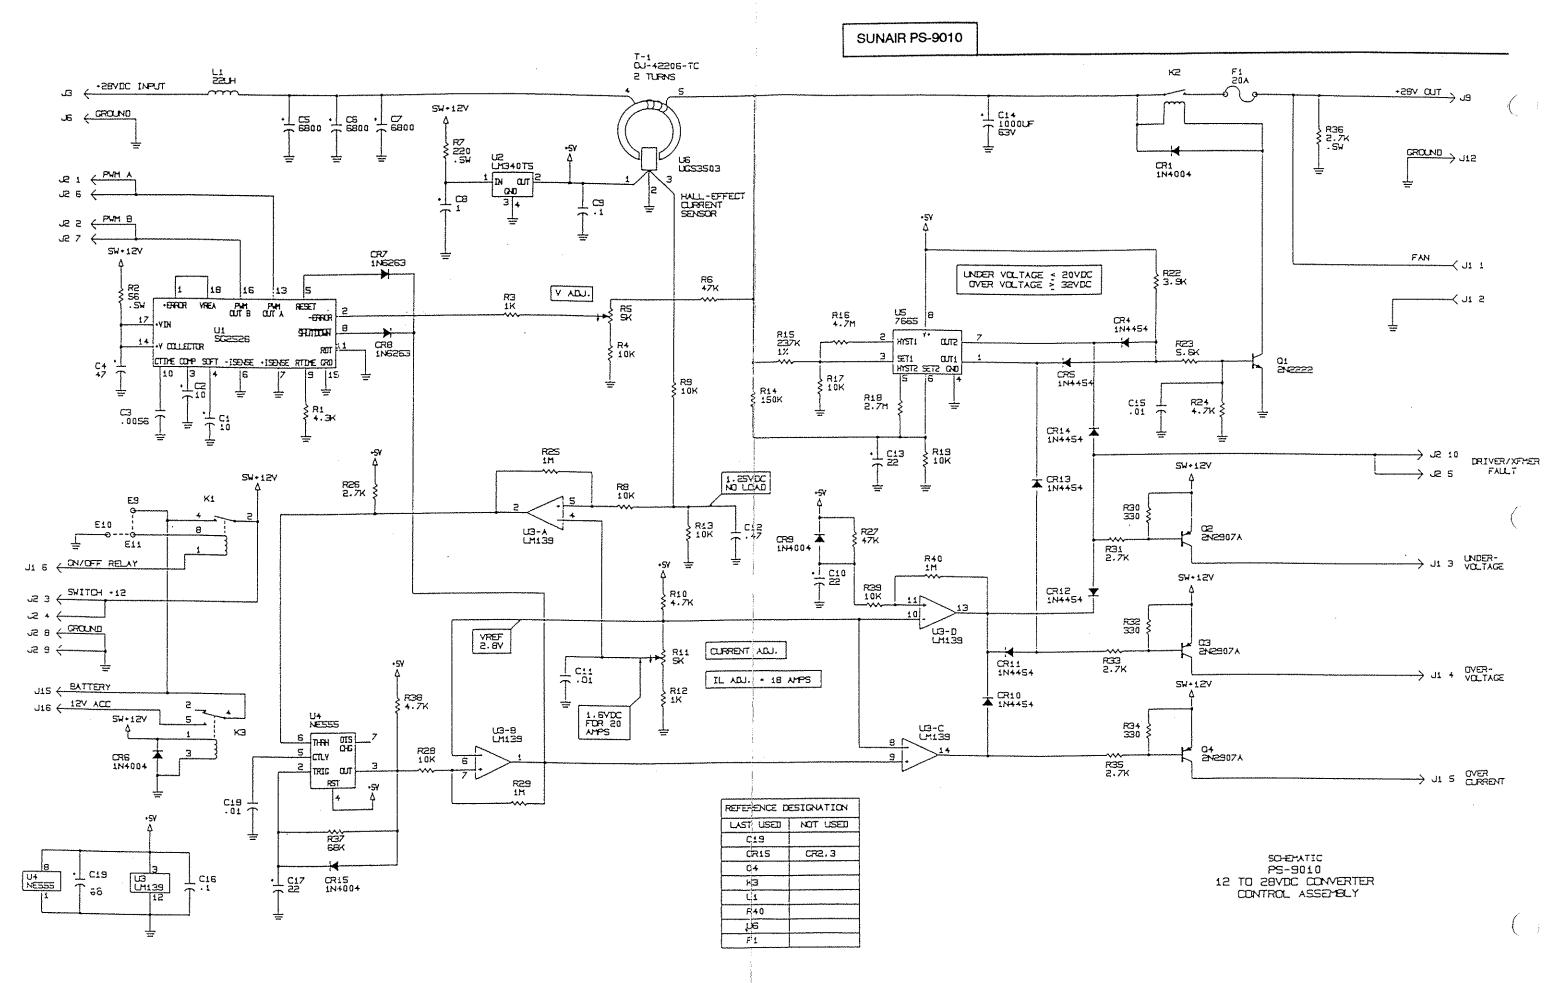

Figure 3.1.1 Front Panel Control and Indicators.

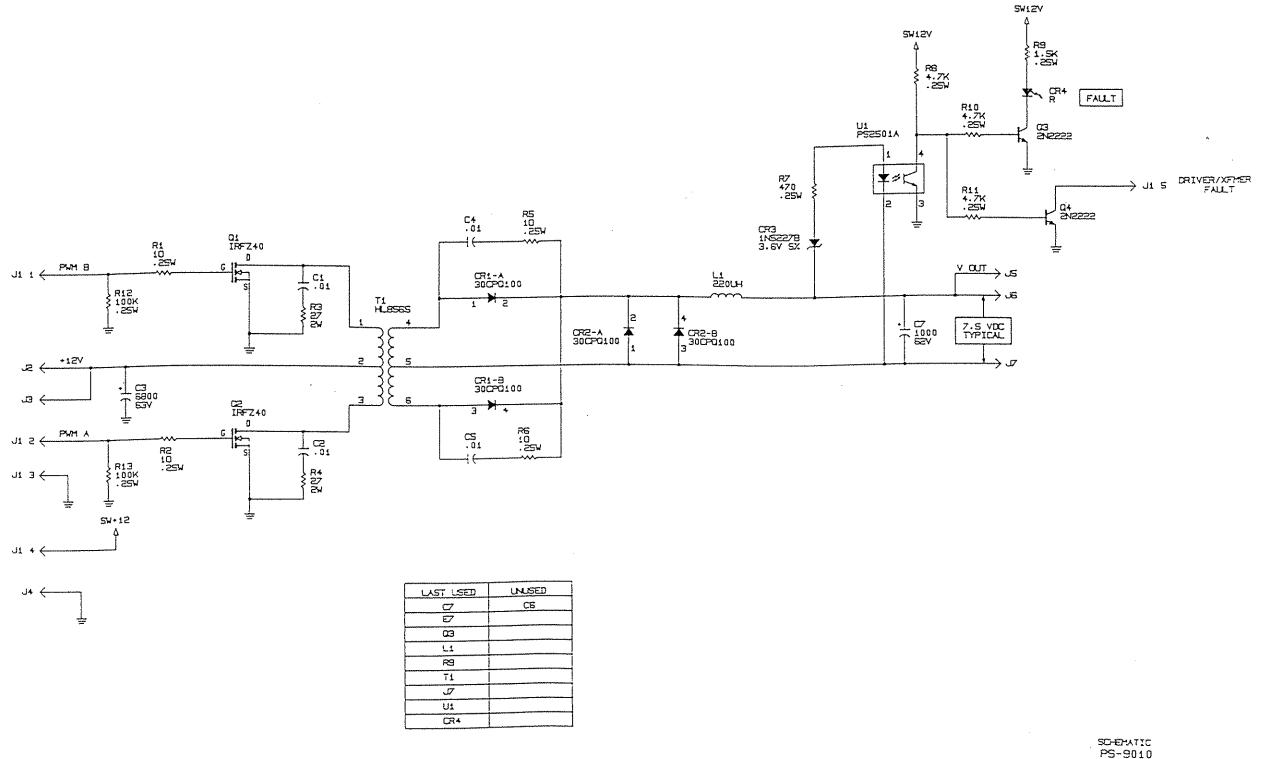

- 1 POWER SWITCH / CIRCUIT BREAKER
 - When this switch is in the UP position the converter is 'ON'. The DOWN position is 'OFF'.
- 2 ON (Lamp)
 - Green lamp indicates that the converter is 'ON'.
- 3 OVER CURRENT (Lamp)
 - Red lamp indicates over current condition in output voltage.
- 4 OVER VOLTAGE (Lamp)
 - Red lamp indicates greater than 32 VDC output.
- 5 UNDER VOLTAGE (Lamp)
 - Red lamp indicates less than 20 VDC output.
